我这个是事后才截图, CCS 是 6.1.1 的, 不同版本可能不太一样.

1. 问题:

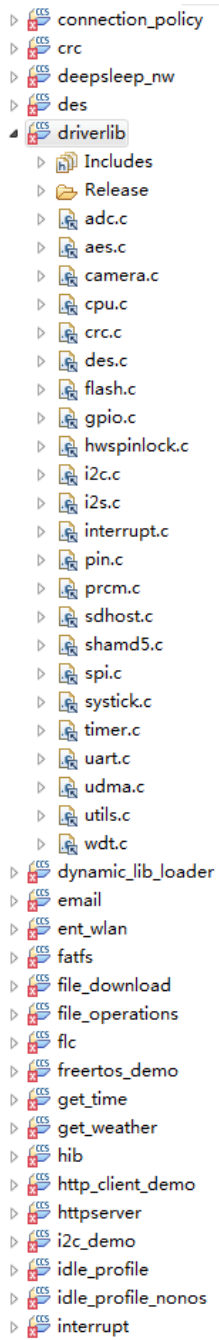

新安装 CCS 后编译出现问题: gmake: No rule to make target clean

截图如下

```
**** Clean-only build of configuration Release for project driverlib ****

"D:\\ti\\ccsv6\\utils\\bin\\gmake" -k clean
gmake: *** No rule to make target `clean'.

**** Build Finished ****
Buildfile generation error occurred..
This project was created using a version of compiler that is not currently installed: 5.1.5
[ARM]. Please go to CCS App Center to install the compiler of this version, or migrate the
project to one of the available compiler versions by adjusting project properties.
Build stopped..
```

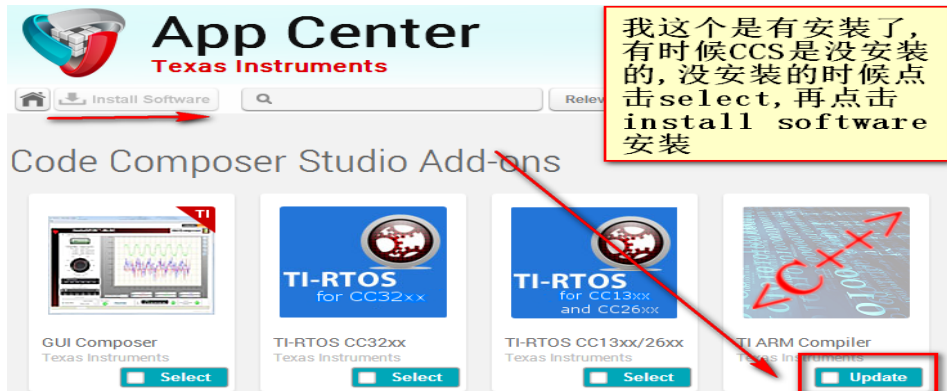

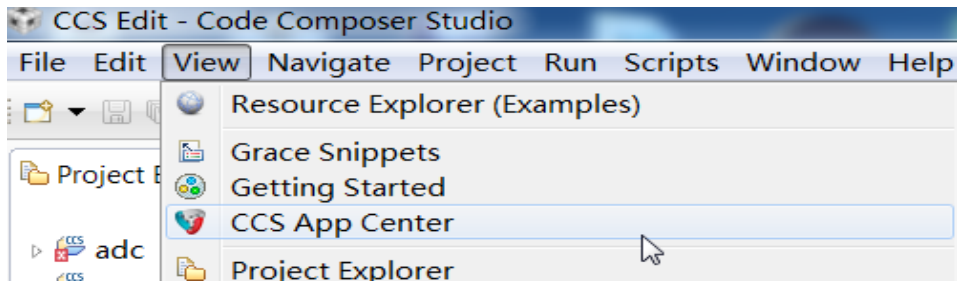

2. 原因:

编译器没有装好或者是不匹配

3. 解决办法:

1) 重新安装编译器

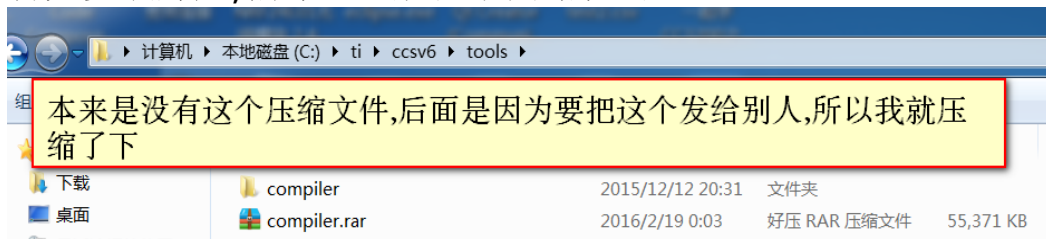

点击

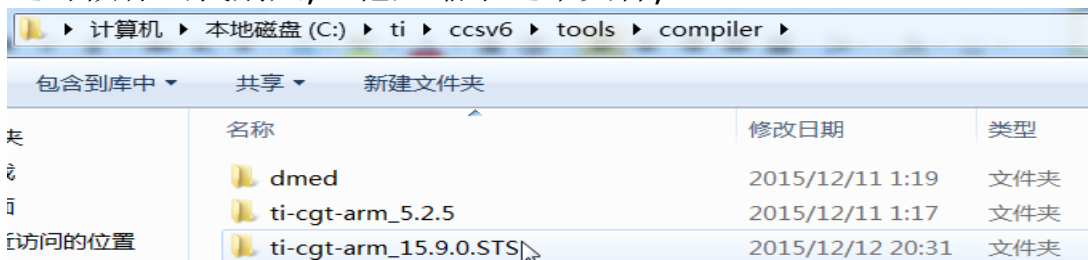

点击安装,安装好后就可以用了,有些机器是会安装失败的,这时候需要用第二种办法安装了.

2) 手动给工程配置编译器,需要从别人那里获取编译器

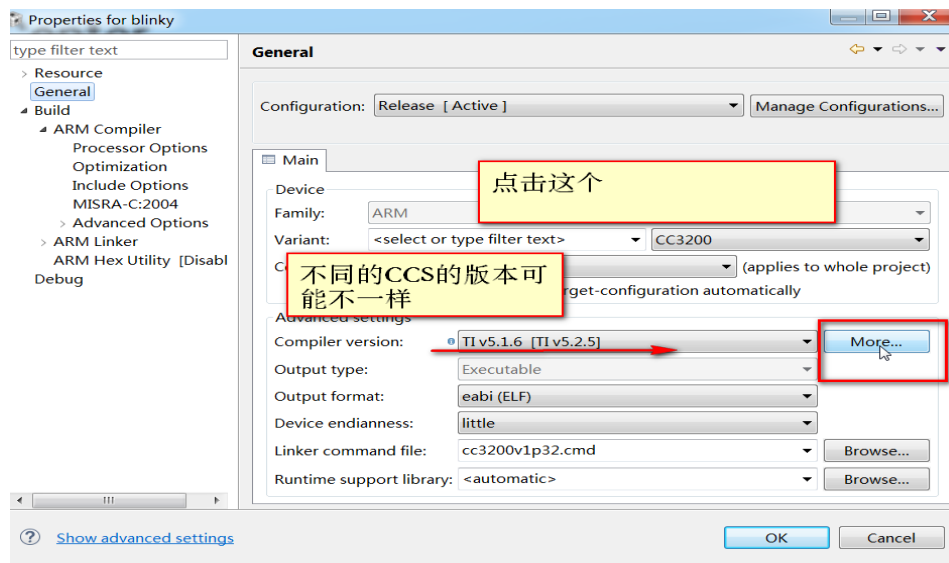

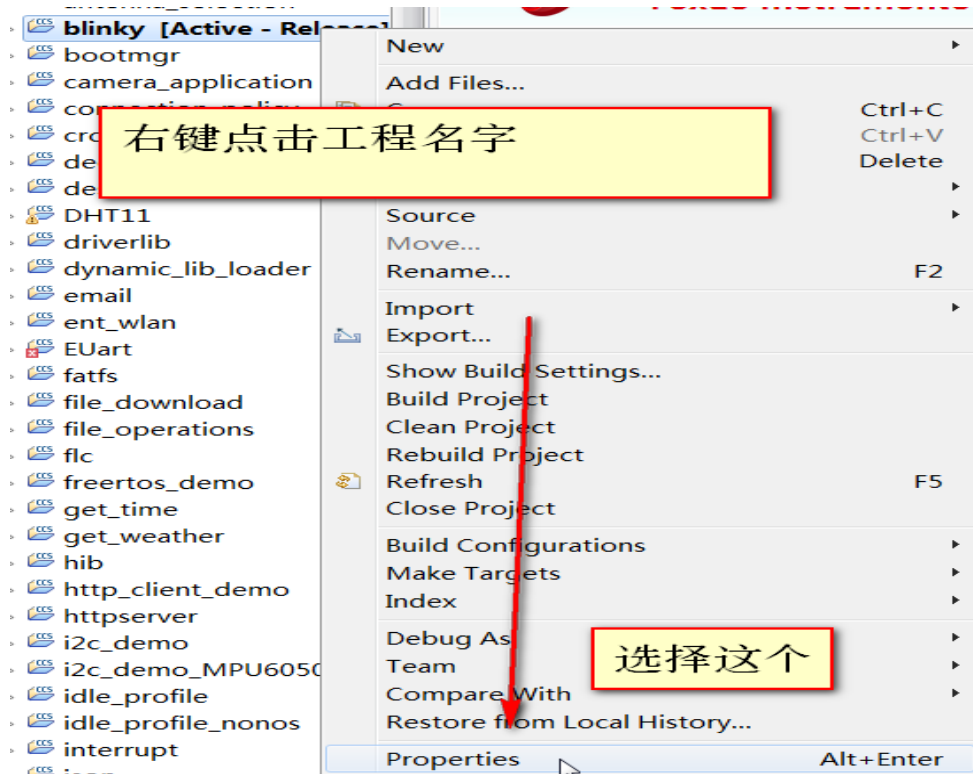

首先安装好后,编译器是放在下面路径的

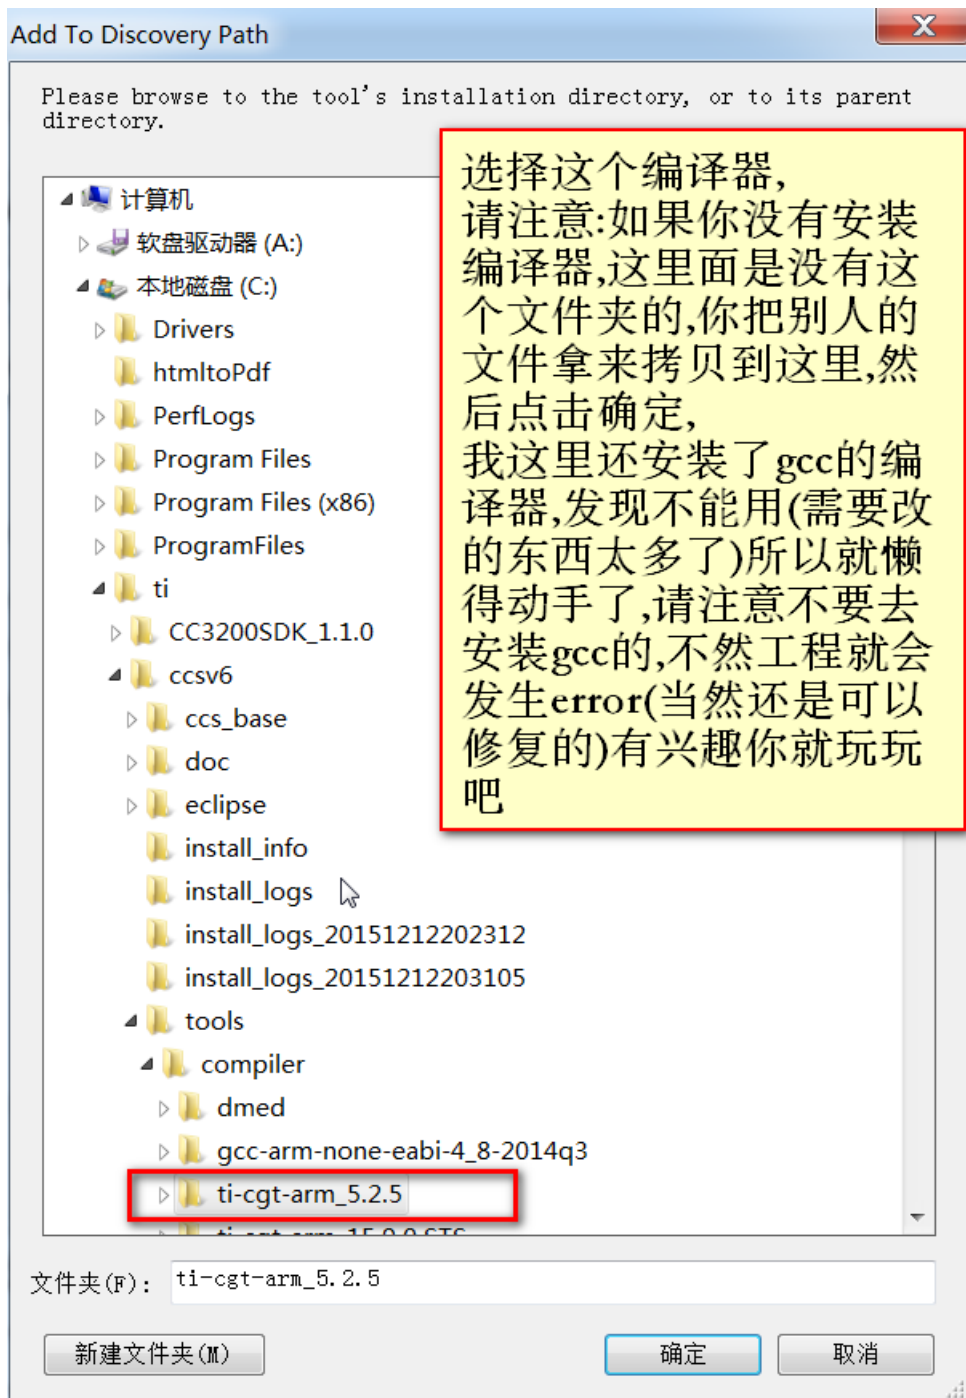

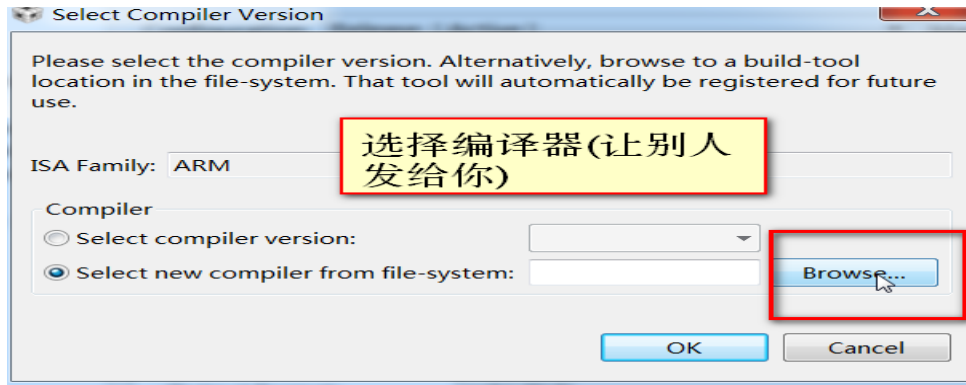

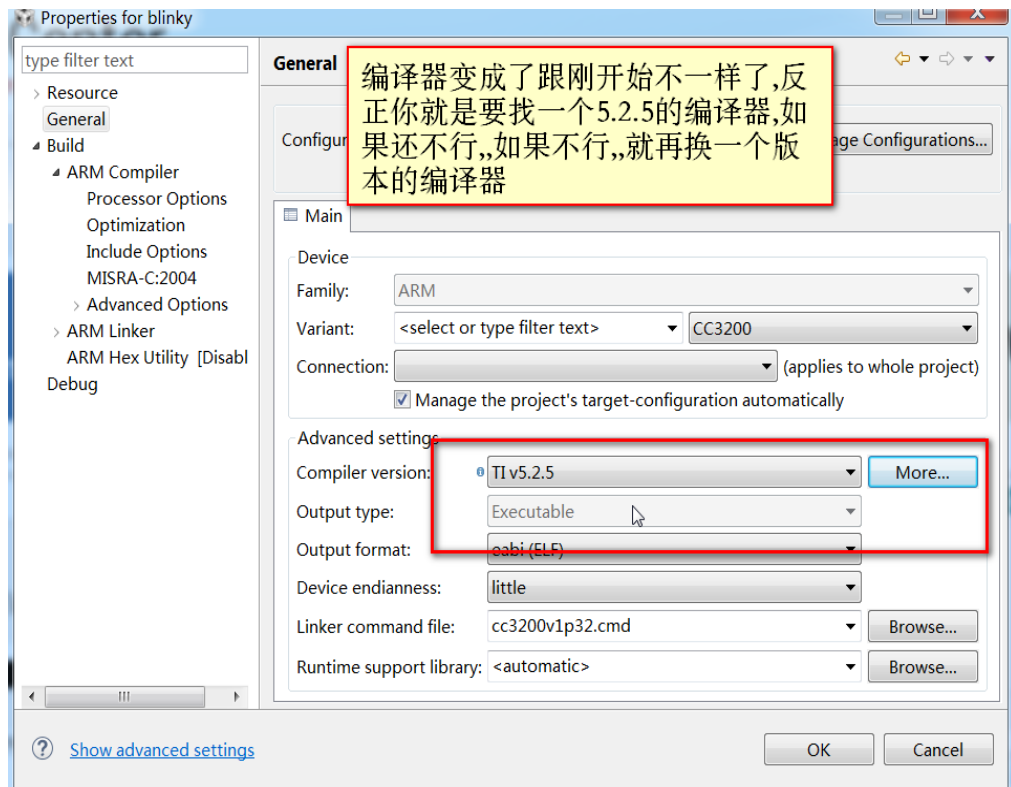

这时候你去找别人,让他压缩下这个文件,

等你拿到这个文件后, 点击

点击 OK
就这样了,祝你好运!!!
